

nCounter™ Human Reference GX Kit

Package insert for the nCounter™ Human Reference GX Kit

Product Description

The nCounter™ Human Reference GX Kit is designed to provide a fast and easy way to select reference genes for your experiments. The nCounter Human Reference GX Kit components consist of the probes or CodeSet and all consumables and reagents needed to run the assay. The CodeSet targets 18 genes expressed at different levels across a wide variety of tissues. Each of the sequences is targeted by two different probes, the Reporter and the Captures probes.
